

Garden groundwork in Autumn

Year round fertilising for year round health

Like humans and animals, plants require regular feeding throughout the year – at least once in each season.

Happy, healthy, well nourished plants are more resistant to pests, diseases, heat stress and frost.

Vegetables & Herbs: Give all your edibles a monthly dose of GOGO Juice to help them through any remaining summer heat waves – this will also encourage tasty new growth! Start preparing your garden beds for autumn & winter vegetables by reconditioning the soil with a generous 1-2 handfuls of Rocket Fuel per sq metre. It is also an idea to check your soil pH at this preparation stage and add lime to neutralise the pH if needed.

Flowering Plants: Extend the flowering season of summer annuals with an application of Sudden Impact for Roses, 100g per sq metre spread over the area and watered in well (with GOGO Juice) will give them strength for a final summer flush of flowers.

Keep an eye on your orchids during the warmer months (you may need to water 2-3 times a week in extreme heat) but remember to reduce watering once the autumn rains arrive. Feed in autumn with Strike Back for Orchids to promote flowering spikes.

Fruit Trees: Citrus trees will benefit from a good application of Rooster Booster or Bounce Back now – spread 1-2kg per tree, making sure you spread it right out to the edge of the dripline.

Stonefruit trees need a 1-2kg application of Seamungus or Rapid Raiser after you've finished harvesting.

Natives: As the autumn rains arrive, give all natives 100g of Seamungus to help promote healthy, new autumn growth.

Lawns: If your lawn is looking a bit stressed after the summer heat, rejuvenate it with one of our seaweed rich products; either a top dress of Seamungus crumble or a fortnightly watering of GOGO Juice.

HINT – clip the GOGO Juice 2ltr spray pack onto your hose for lawn application... so easy and quick!

As autumn rains arrive, now is a good time to lay turf. Prepare the soil beforehand with Seamungus Crumble – It will give the new roots of your turf the TLC they need to become established. Water new turf monthly with GOGO Juice to improve new root growth.
