

# GOGO Juice has never looked so good!

Neutrog have recently unveiled a new look GOGO Juice! The 1 litre concentrate is now in an easy to open plastic bottle with a no-drip measuring cap, and the 2 litre ready-to-use spray pack has also been revamped. Both can be reused and recycled. Keep an eye out for our new look packaging on the shelves at your local hardware store or garden centre.

## What is GOGO Juice?

GOGO Juice is the result of years of extensive research and development in conjunction with The Flinders University of South Australia and a consulting scientist in the USA. The very first trial batch was 'brewed' in anaerobic conditions (with no air added), utilising a 20 litre home brewing beer kit!! Today GOGO Juice is commercially manufactured aerobically (with air added) in huge stainless steel vats over an 8-12 week brewing period.

GOGO Juice is teeming with microbiology and is essentially a probiotic for your soil and plants. These microbes activate the natural processes that occur in the soil, speeding up the decomposition of the residual organic and mineral compounds, ultimately increasing the nutrient availability and stimulating growth.

GOGO Juice combines the 'catalytic' power of the billions of beneficial bacteria along with the well documented benefits of applying kelp, seaweed, fish, humic acid and manure. Hence, you are not only feeding your plants with all the goodness of a wide range of organic nutrients, but you are also providing your soil with the "workers" (beneficial bacteria) that assist in breaking down the organic matter, maximising the nutrients available to your plants.

The carefully selected microbes have been proliferated utilising complex carbohydrates and sugars through a unique aerobic brewing system in which the kelp, seaweed, humic acid and manure have been digested by the beneficial bacteria. The resultant product provides a huge boost of the living microbiology necessary for your soil and plants to perform at their optimum level, increasing their ability to resist pest and disease and to withstand heat and frost stress. The microbiology in GOGO Juice promotes plant growth as well as stimulating and improving root growth and development.

### Julie & Dave from Surrey Downs, SA, sent us an email and attached this surprising photo

Hi, we just had to send this to you! We have just starting using your products... Planted the lawn in the background about 2 months ago - Roll out instant. We have been using GOGO Juice every couple of weeks and it has looked amazing! No die off anywhere.

But the amazing thing is the rose bush in the foreground that has received overspray from the GOGO Juice. It is on the corner and has more lawn at the side of it and looks completely different to all the other roses! Has started flowering and the leaves are glossy, unlike all the others that have yellow spot etc.

All the other roses are ready to be pruned for winter but this rose bush has never looked so good and it is June - new buds everywhere! Love your products - all our plants are looking great due to Cock n Bull, Seamungus and GOGO Juice! We have told all our friends and our neighbours who constantly admire our new lawn!!

Thanks again.

# Who uses GOGO Juice?

GOGO Juice is used by AAMI Stadium, on the track and rose garden at Flemington Racecourse, on playing fields at the Royal Botanic Gardens Sydney and the well-known Benalong Lawns in the Domain. Iconic rose gardens including Morwell Centenary Rose Garden, Victoria State Rose Garden and the National Rose Trial Garden in SA, are also users of GOGO Juice.

Advocates include many professional landscapers, commercial vegetable growers, viticulturists, farmers and others who rely on the quality of their produce for their livelihood. Home gardeners can now enjoy the benefits of applying GOGO Juice to their own gardens and veggie patches.

# Roses shrug off Black Spot during GOGO Juice trial

Untreated

Treated with GOGO Juice

Graham Douglass, Chairman of the Wynn Vale Community Garden trialled GOGO Juice on standard rose bushes at the garden. Applied regularly over a number of months these two photos are a clear example of the difference GOGO Juice made. Graham said, "As you can see, the untreated bush is badly affected by black spot and aphids are present, whereas the treated bush is very clean, there are no black spot or aphids and the bush appears much larger due to healthier foliage."

Untreated

Treated with GOGO Juice

GOGO Juice trial results on parsley at Virginia in South Australia.

Untreated

Treated with GOGO Juice

SA Farm Trials demonstrated that carrots treated with GOGO Juice produced larger crops, had darker centres and were noticeably sweeter than the untreated carrots.

# When to use GOGO Juice?

- Apply:**
- at planting
  - at the first signs of new growth
  - just prior to bud burst
  - monthly to your whole garden
  - NOW!

GOGO Juice is ideal for your vegetable patch, natives and all potted plants and lawn areas. Also a great kick start for your compost heap, adding the microbes needed to speed up the process.
