

Welcome to our July issue

Company News: Neutrog Celebrates 30 Years of Embracing the Bugs

Neutrog will celebrate its 30th birthday this month, which is quite the feat for a company that started from humble beginnings. With this milestone upon us, we take a trip

Product Trials: Rapid Raiser Trials Begin at Brooklyn Station

Neutrog is taking part in a new trial in South Australia, putting Rapid Raiser to the test against two competitor products to see if organically provided nutrients are as effective (or

Each Neutrog product contains a full range of nutrients.

*Liebig's Law of the Minimum states:
The availability of the most abundant nutrient in the soil is only as good as the availability of the least abundant nutrient – growth is not controlled by the total amount of nutrients available, but rather by the scarcest nutrient (limiting factor).*
