

Rocket Fuel

**Give your fruit & vegies
the blast they need**

Rocket Fuel

Rocket Fuel is a BFA Registered organic fertiliser that has been specifically developed for growing healthy organic fruit and vegetables.

Applying Rocket Fuel to your soil all year round (once in each season) will allow your fruit and vegetables to access the nutrients they need for optimum performance providing you with healthy and tasty produce from your garden.

This product was inspired by Neutrog's ongoing involvement over many years with numerous primary schools and their vegetable gardens throughout Australia. The sheer joy these gardens gave to so many kids had us hooked!!

Neutrog formed a partnership with the Stephanie Alexander Kitchen Garden Foundation to develop this organic fruit and vegetable fertiliser to support their work nationally.

Established in 2004, the Stephanie Alexander Kitchen Garden Foundation exists to pleasurably engage and educate young children in growing, harvesting, preparing and sharing delicious and healthy food. The mission and purpose of the Foundation is expressed through the flagship Kitchen Garden Program.

Rocket Fuel is supplied free of charge to primary schools participating in the Foundation's Kitchen Garden Program, with part proceeds of Rocket Fuel sales supporting the Program nationally.

Application rates

Rocket Fuel can be used throughout your entire garden and is safe to use on natives and bare-rooted roses.

Vegetable Patch	Application
Bed preparation (pre-plant)	100g (2 scoops) per square metre.
Established	50g (1 scoop) per square metre every 6 weeks during the growing period, or as required.

Planting	100g (2 scoops) per plant to base of hole and cover with 1-5cm of soil.
Established (up to 2yrs)	100g (2 scoops) in each season (including winter) throughout the year.
Established (2yrs plus)	200g (4 scoops) in each season (including winter) throughout the year.
General Garden	Application
Bed preparation	100g (2 scoops) per square metre.
Established	100g (2 scoops) per square metre in each season (including winter) throughout the year.

Year Round Fertilising

Year round feeding for year round health

The plants in our gardens are like animals and humans, they grow best when they are well nourished and fed regularly.

Happy healthy plants don't get sick and are less likely to be affected by pests or diseases.

Applying organic fertilisers all year round, once in each season, will give your plants the best chance to perform at their optimum.

Rocket Fuel Analysis (dry weight basis)	%W/W
Nitrogen (N)	as Organic 3.8
Phosphorus (P)	as Citrate Soluble 1.3
Potassium (K)	as Organic 1.5
Sulphur (S)	as Organic 1.0
Calcium (Ca)	as Organic 5.0
Magnesium (Mg)	as Organic 0.8
Iron (Fe)	as Organic 0.5
Manganese (Mn)	as Organic 0.045
Zinc (Zn)	as Organic 0.03
Copper (Cu)	as Organic 0.0075
Boron (B)	as Organic 0.04
Molybdenum (Mo)	as Organic 0.0003
Organic Carbon	33
Humic Acid	4.0

Based on applying 100g per square metre
