

Garden groundwork in Summer

Year round fertilising for year round health

Like humans and animals, plants require regular feeding throughout the year – at least once in each season. Happy, healthy, well nourished plants are more resistant to pests, diseases, heat stress and frost.

As the weather heats up keep an eye out for heat stress in ALL areas of your garden. Applying products rich in seaweed and organic matter, like **Seamungus** and **GOGO Juice**, around your plants can help to improve the soils water holding capacity AND the plants ability to tolerate hot weather.

Vegetables & Herbs: Pull out any weeds competing for water and give your herbs and vegies a blast with **Rocket Fuel**.

Flowering Plants: Dead head azaleas, rhododendrons and camellias – lightly prune to shape and then apply **Kahoona** at a rate of 100g per plant.

Dead head roses regularly to encourage new growth and flowers. Apply 100g per plant of **Sudden Impact for Roses** every 6-8 weeks throughout summer and autumn for a beautiful rose display.

Summer flowering annuals, like petunia, zinnia and marigolds can also be fed with **Sudden Impact for Roses** (if they are in the ground) or **Strike Back for Orchids** (if they are in a pot).

Once orchids have finished flowering, they can be repotted and divided if needed. Mix **Seamungus Crumble** through the orchid bark when repotting and dose with an

application of **GOGO Juice** to settle the plants in. The repotted orchids can be fed with **Strike Back for Orchids** pellets or liquid concentrate again in Spring.

Fruit Trees: Feed all stonefruit trees with **Gyganic for Fruit & Citrus** to encourage new growth. Apply around the dripline and water in well.

Make sure all fruit trees, including citrus have a regular supply of water over the summer months – this will reduce the risk of fruit splitting and improve fruit and flavour development.

Natives: In mid-summer give natives a light trim, to maintain shape and feed with **Seamungus**.

Lawns: To encourage lush green growth over summer feed your lawns with a nitrogen boosted fertiliser such as **Upsurge** or **Sudden Impact for Lawns**.

If however, your lawn is a bit patchy and showing signs of heat stress and overuse we recommend applying **Seamungus Crumble** and **GOGO Juice** – this combination is a little bit of “TLC” for your lawn and will help it to recover gently.
