

# AUGUST IN THE GARDEN WITH NEUTROG

## NEW PRODUCT COMING SOON!

### SUDDEN IMPACT! FOR LAWNS

Get your lawn spring ready with the **NEW Sudden Impact for Lawns + POPUL8 2L Hose-On** - complete, biological fertiliser in a liquid form, specifically designed to provide a full range of nutrients and biology in a soluble format, able to be taken up by the plant through the leaf, roots and soil.

- Suitable for all lawn types as well as hedges, trees, bamboo ferns, conifers, in fact ALL non-flowering plants!
- Combined with POPUL8 to promote nutrient cycling and liberation, fix nitrogen, produce growth hormones and improve resilience to plant and soil pathogens
- Includes Nitrogen, Phosphorus, Potassium and Macronutrients for colour, growth, root development and resilience to temperature and drought stress.

Available exclusively at Bunnings.

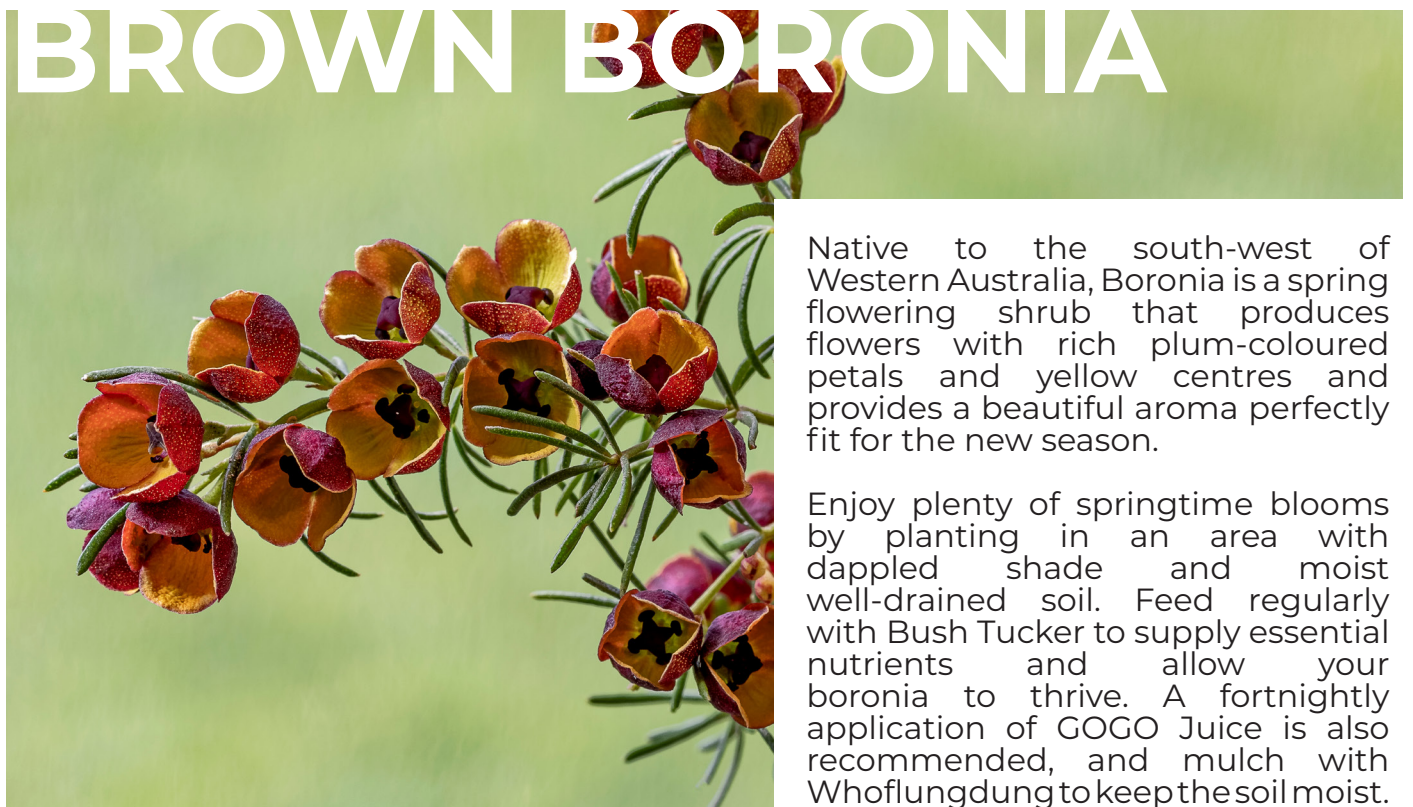

# AUGUST BIRTH FLOWERS

Just like birthstones, birth flowers are symbolic of the month we're born in, and each one carries a special meaning. Gladiolus is the birth flower for August and the native birth flower is Boronia.

Gladiolus is a genus of perennial cormous flowering plant in the iris family and is amongst the most wonderful corms available for the summer garden. There are an assortment of bold colours available from late winter onwards, including red, pink, orange, yellow, purple and white.

When planting, place your corms approximately 10-15cm deep, depending on its size, and space approximately 15cm apart. Once they are flowering, fertilise fortnightly with Sudden Impact for Roses Advanced Biological Formula.

Native to the south-west of Western Australia, Boronia is a spring flowering shrub that produces flowers with rich plum-coloured petals and yellow centres and provides a beautiful aroma perfectly fit for the new season.

Enjoy plenty of springtime blooms by planting in an area with dappled shade and moist well-drained soil. Feed regularly with Bush Tucker to supply essential nutrients and allow your boronia to thrive. A fortnightly application of GOGO Juice is also recommended, and mulch with Whoflungdung to keep the soil moist.

# PLANTING IN AUGUST

Don't forget your garden this winter, as while it seems there is very little happening above the soil, there is still plenty happening below the surface.

Equip your garden with biological products rich in seaweed, kelp and beneficial bacteria and fungi to ensure a thriving display once spring comes around. Seamungus and GOGO Juice are ideal for use in winter to help your plants resist frost, pests and disease as well as conditioning the soil and encouraging root growth.

Additionally, adding a layer of Whoflungdung to your garden at this time of the year will act as a 'blanket', protecting the plant roots while regulating soil temperature, improving soil structure with organic matter, and preventing erosion of top soil from heavy rain.

Seamungus, GOGO Juice and Whoflungdung are also our planting (and transplanting) trifecta to give plants the best start in their new home.

## COOL ZONE

(TASMANIA, ACT, MELBOURNE, BALLARAT, BENDIGO, GEELONG  
& MOUNT GAMBIER)

### FRUIT & VEGETABLES

Asparagus  
Beetroot  
Broad Bean  
Broccoli  
Cabbage

Parsley  
Rocket  
Rosemary

### FLOWERS

Ageratum  
Alyssum  
Aster  
Begonia  
Candytuft  
Carnation  
Cineraria  
Cockscomb  
Cornflower  
Delphinium  
Dianthus

# FERTILISING IN AUGUST

**Year round  
fertilising for  
year round  
health**

Like humans and animals, plants require regular feeding throughout the year – at least once in each season.

Happy, healthy, well nourished plants are more resistant to pests, diseases, heat stress and frost.

## HEDGES

If you have hedges around your garden then they will soon be ready for a feed with Sudden Impact for Lawns with POPUL8. Water this in well to ensure maximum growth once spring arrives.

## FRUIT TREES

Once the weather begins to warm up, it will be time to fertilise your fruit trees. Apply Gyganic for Veggies, Fruit & Citrus around the drip line. Water in well with POPUL8.

## NATIVES

Many native plants flower in winter & spring. Feed now with Bush Tucker for a stunning display. Water in with GOGO Juice.

## LAWN

There is still time to fertilise your lawn, apply Blade Runner or Seamungus Crumble, water in with GOGO Juice.

## FLOWERING ORCHIDS

We'd all love lots of flowers on our plants. Later flowering cymbidium orchids will benefit from an application of Strike Back for Orchids. Apply fortnightly with the liquid form and monthly with the pelleted form. This will encourage more flower spikes.

## ACID LOVING PLANTS

Camellias, azaleas and daphne are in flower now. Apply Kahoona for acid loving plants every 8 weeks to keep them looking beautiful and for early spring flowering varieties so that they set strong flower buds. Water in with GOGO Juice.

# OTHER HELPFUL TIPS!

1

On those wet days, keep an eye out for snails and slugs. Remove by hand before they multiply. Particularly watch for early spring flowering plantings, as snails love them – especially petunias. Another one to look out for are your bearded iris rhizomes. They'll be starting to put on growth now and the snails and slugs love this too!

2

For some late winter/early spring colour choose from the wide range of instant colour available at your garden centre. Beautiful primroses, polyanthus, primula, pansies and violas look great in the ground or in pots.

3

If you love a cottage garden look, then choose now from traditional flowers which are a staple of this gardening style. You can plant seedlings of hollyhock, delphiniums, cleome, larkspurs, lupins and canterbury bells. Planting now will allow them to establish and form a strong root system before late spring/summer flowering.

4

Visit your garden centre to check out what early perennials have arrived in store. This will help you with planning your spring and summer colour. A great one to watch for are the huge range of salvias.

5

It won't be long until the weather starts to warm up. Now is the ideal time to plan what vegetables you'd like to plant this spring. You could even begin sowing tomato seeds if you have a glasshouse or protected position in which to raise them.

## NEUTROG POT GUIDE

All potted plants will need a feed to keep them thriving throughout the year.

Application rates differ depending on the size of the pot you are using, so to make it easier for you, we have put together this simple guide.

Pot Size	40"/100cm	30"/76cm	20"/50cm	12"/30cm	6"/15cm
Strike Back for Orchids:	100g	75g	50g	30g	15g
Sudden Impact for Roses:	185g	135g	85g	45g	15g
Kahoona:	185g	135g	85g	45g	15g
Seamungus:	250g	190g	125g	75g	40g
Bush Tucker:	150g	115g	75g	45g	25g
Gyganic:	185g	135g	85g	45g	15g
Human Beans:	185g	135g	85g	45g	15g
