SEPTEMBER BIRTH FLOWERS

Just like birthstones, birth flowers are symbolic of the month we're born in, and each one carries a special meaning. Aster is the birth flower for September and the native birth flower is Gum Blossom.

ASTER

Asters show their beauty through late summer and autumn, when many of our summer blooms may be fading.

Asters prefer climates with cool, moist summers and loamy soil that has good drainage. Plant in spring after the danger of frost has passed, starting with soil preparation by incorporating Seamungus and watering in well with **GOGO Juice** every two weeks. Once they are more than two months of age, you can start to apply **Sudden Impact for Roses** every eight weeks to ensure healthy plants that produce plenty of flowers.

GUM BLOSSOM

Gum Blossoms are a real spring treat creating lovely displays in September making them a great choice for native flower of the month.

Some of the varieties of flowering gums include Eucalyptus caesia 'Silver Princess' with large deep-pink flowers with bell-shaped gumnuts covered in a white mealy coating.

When planting eucalyptus trees, ensure to feed with a biological fertiliser like **Bush Tucker** to ensure strong root development.

PLANTING IN SEPTEMBER

Spring is in the air and if you are yet to do so, now is a great time to dust off those gardening tools and get back to gardening!

The soil will begin to warm up as our days become warmer, so think carefully about any new plants you'd like to add. A little bit of planning now gives you time to prepare for a productive season, including whipping the soil into shape prior to planting.

Condition the soil with Seamungus and water in with GOGO Juice for a boost of beneficial microbiology and to create a healthy base for optimal root development.

Additionally, adding a layer of Whoflungdung will provide the soil with plenty of organic matter for a well-structured soil, and will help to regulate temperature and retain moisture as the days get warmer.

COOL ZONE

FERTILISING IN SEPTEMBER

**Year round
fertilising for
year round
health**

Like humans and animals, plants
require regular feeding throughout the year
– at least once in each season.

Happy, healthy, well nourished plants are more
resistant to pests, diseases, heat stress and frost.

HEDGES

If you have hedges around your garden then they will now be ready for a feed with **Sudden Impact for Lawns + POPUL8**. Water this in well to ensure maximum growth once spring arrives, or apply using the new **Sudden Impact for Lawns + POPUL8 Hose-On**.

POTS

For those gardeners who have a balcony, courtyard or lots of container grown plants; fertilise them now with **Strike Back for Orchids**. With it's boosted trace elements you'll be applying everything a potted plant needs to thrive - this includes indoor plants.

VEGETABLES

If your veggie garden is already established then a good application of Whoflungdung will keep them weed free and moist. Your veggies need to be fed and watered prior to applying the mulch. Feed with **Gyganic for Veggies Fruit & Citrus** and water in with **GOGO Juice**.

FLOWERS

For spring and early summer colour choose from the wide range of annuals available at your local garden centre. Prepare the soil by incorporating **Rapid Raiser** throughout and water in well with **GOGO Juice**. Feed with **Sudden Impact for Roses** for strong and floriferous plants.

NEW LAWNS

Prior to laying instant turf or planting a new lawn, incorporate **Blade Runner** throughout the soil. This will encourage a strong and vigorous root system and get the lawn off to the best possible start.

NATIVES

Many native plants will be flowering soon, so now is a great time to feed with **Bush Tucker** for a stunning display. Water in with **GOGO Juice**. You might like to try the new **Bush Tucker Advanced Biological Formula** for this (available online only)!

NEUTROG POT GUIDE

All potted plants will need a feed to keep them thriving throughout the year.

Application rates differ depending on the size of the pot you are using, so to make it easier for you, we have put together this simple guide.

Pot Size	40"/100cm	30"/76cm	20"/50cm	12"/30cm	6"/15cm
Strike Back for Orchids:	100g	75g	50g	30g	15g
Sudden Impact for Roses:	185g	135g	85g	45g	15g
Kahoona:	185g	135g	85g	45g	15g
Seamungus:	250g	190g	125g	75g	40g
Bush Tucker:	150g	115g	75g	45g	25g
Gyganic:	185g	135g	85g	45g	15g
Human Beans:	185g	135g	85g	45g	15g
