

OCTOBER

IN THE GARDEN WITH NEUTROG

OCTOBER BIRTH FLOWERS

Just like birthstones, birth flowers are symbolic of the month we're born in, and each one carries a special meaning. Marigold is the birth flower for October and the native birth flower is Callistemon.

MARIGOLD

Marigolds are a delight to have in the garden that can be planted early in spring once the danger of frost has passed. Incorporate plenty of Seamungus and Rooster Booster or Rapid Raiser throughout your soil.

Sow the seeds about an inch apart from each other and water in with **GOGO Juice** and do so every fortnight. Once your seedlings are six weeks of age, then begin fertilising every 8-10 weeks with **Sudden Impact for Roses**, sit back and enjoy the golden blooms.

With its iconic, vibrant red flower spikes, Callistemon or more commonly known as bottlebrush is a nostalgic favourite for many gardeners.

This heat, drought and frost tolerant plant will grow in any type of soil, however by using **Bush Tucker** and **GOGO Juice** you can ensure your plants thrive and produce stunning displays of flowers. Apply after signs of new season growth and thereafter every 12 weeks, or as required, throughout the growing season. Keep fertiliser at least 20cm away from the base of plant and avoid contact with foliage or flowers.

PLANTING IN OCTOBER

Now is the perfect time to add some new plants into your garden, but before you do, be sure that you are setting them up for success in their new home.

The spring soil is warming up, creating the perfect environment for plants to establish in their new home. Prior to planting, condition the soil with **Seamungus** and **GOGO Juice** for a boost of beneficial microbiology and create a healthy base for optimal root development.

Additionally, applying a layer of **Whoflungdung** will provide the soil with plenty of organic mater for a well structured soil and to regulate soil temperature and retain moisture as we head into the drier months of the year.

COOL ZONE

(TASMANIA, ACT, MELBOURNE, BALLARAT, BENDIGO, GEELONG & MOUNT GAMBIER)

FERTILISING IN OCTOBER

**Year round
 fertilising for
 year round
 health**

Like humans and animals, plants
 require regular feeding throughout the year
 – at least once in each season.

Happy, healthy, well nourished plants are more
 resistant to pests, diseases, heat stress and frost.

POTTED COLOUR

Christmas will be here before we know it, so consider planting up some pots and baskets for colour to brighten your home for the festive season. Once established, begin feeding every 8 weeks with **Strike Back for Orchids** for healthy soil, healthy plants and plenty of flowers.

LAWN

Feed your lawns now with Sudden Impact for Lawns. Non-flowering plants such as hedges, ferns, palms and conifers will also thrive using our lawn fertilisers. Try the new **Sudden Impact for Lawns Ready-to-Use Hose On** or granules. Both versions are equipped with **POPUL8** for healthy green plants.

VEGGIE PATCH

Plan and prepare to plant your summer veggie garden. Tomatoes, Sweet Corn and a wide range of herbs to complement your cooking can be planted now. Incorporate **Human Beans** throughout the soil and water in well with **GOGO Juice**.

FLOWERS

For spring and early summer colour choose from the wide range of annuals available at your local garden centre. Prepare the soil by incorporating **Rapid Raiser** throughout and water in well with **GOGO Juice**. Feed with **Sudden Impact for Roses** for strong and floriferous plants.

SUCCULENTS

Succulents are available in a wide range of sizes, foliage colours, shapes and textures. They're generally quite hardy, but similar to Australian natives; they will perform really well if fertilised. **Strike Back for Orchids** is ideal. Water in with **POPUL8**.

TREES

If there are plants or trees in your garden which appear to be stressed or not performing to their full potential then spring is a great time to re-juvenate these plants. Apply **POPUL8** as soon as the weather warms up and mulch well using **Whoflungdung**.

NEUTROG POT GUIDE

All potted plants will need a feed to keep them thriving throughout the year.

Application rates differ depending on the size of the pot you are using, so to make it easier for you, we have put together this simple guide.

Pot Size	40"/100cm	30"/76cm	20"/50cm	12"/30cm	6"/15cm
Strike Back for Orchids:	100g	75g	50g	30g	15g
Sudden Impact for Roses:	185g	135g	85g	45g	15g
Kahoona:	185g	135g	85g	45g	15g
Seamungus:	250g	190g	125g	75g	40g
Bush Tucker:	150g	115g	75g	45g	25g
Gyganic:	185g	135g	85g	45g	15g
Human Beans:	185g	135g	85g	45g	15g
